Treatment Timeline

Day 1

Arrive in Cancun

Consultations with MDs
Lab Preparations
Blood work and Baselines
Images and Biopsy
White Blood Cell Mobilization
Aphaeresis and Purification

Day 07

Patient-Specific Development

Dendritic Cell Isolation
Tumor Tissue Processed
Dendritic Cell Purification
Tumor Protein Library
Dendritic Cell Loading 1
Dendritic Cell Loading 2
Dendritic Cell Activation
Dendritic Cell Optimization
Immunotherapy Quality
Product Integrity Analysis

Day 14

Immunotherapy Begins

Consultations
Blood Work and Imaging
Ultrasound-guided injections
Lymph Node Targeting
Dendritic Cell Migration
Dendritic Cell Maturation
Immune Response Begins

Day 28

Immunotherapy Boost

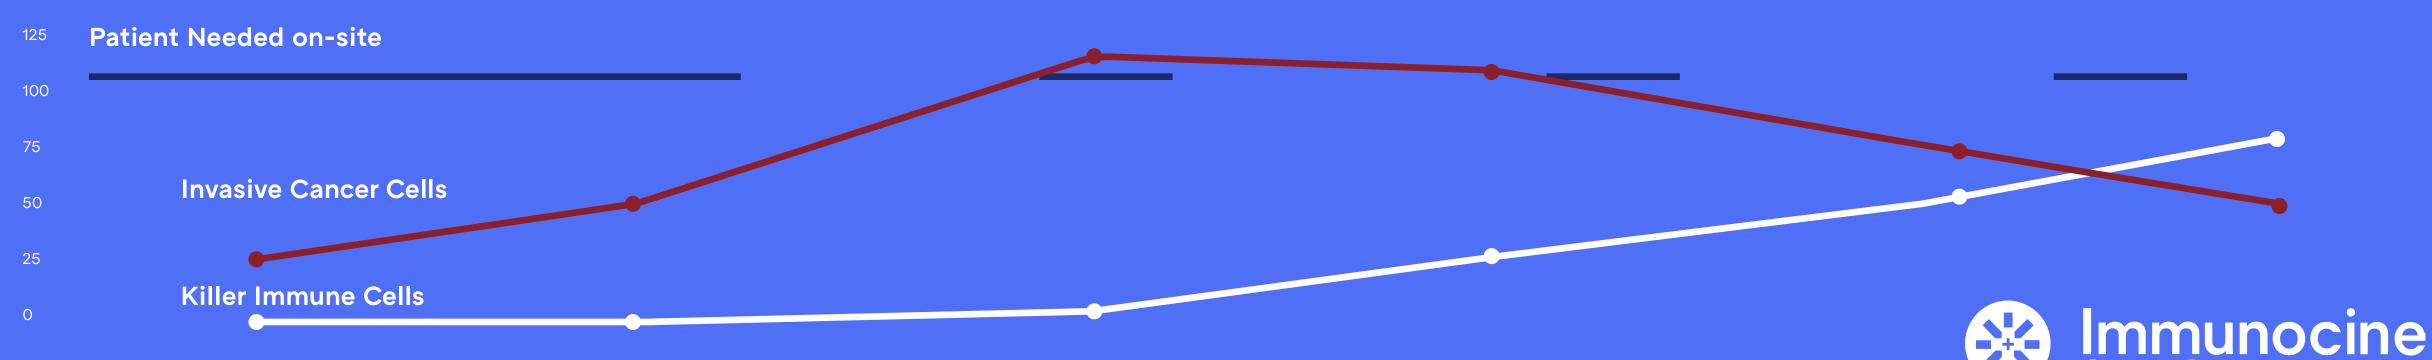

Consultations
Blood Work and Imaging
Ultrasound-guided injections
Lymph Node Targeting
Dendritic Cell Migration
Dendritic Cell Maturation
Immune Response Improves

Day 42

Immunotherapy Completion

Consultations
Blood Work and Imaging
Ultrasound-guided injections
Lymph Node Targeting
Dendritic Cell Migration
Dendritic Cell Maturation
Immune Response Peak and Memory

^{*} This image is representative of results that can happen, but does not imply a guarantee of results.

Biological variability and overall tumor burden at time of immunotherapy treatment will impact final outcomes.
